

Review Form 1.6

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_92417
Title of the Manuscript:	Identification of immunogenic T and B-cell epitope peptides of Rubella virus E1 glycoprotein towards development of highly specific immunoassays and vaccine
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://journaljabb.com/index.php/JABB/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The current research based on Bioinformatics algorithms propose a Theoretical technique to optimize Rubella's Vaccine construction. The layout and scientific approach is very good. Yet, an algorithm needs careful reconstruction in the living biological world.	
Minor REVISION comments	The authors should discuss further the limitations of the study Along with the necessary steps that must be followed till the Verification of the technique.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
