

Review Form 1.6

Journal Name:	Journal of Advances in Microbiology
Manuscript Number:	Ms_JAMB_92240
Title of the Manuscript:	In-vitro Antibacterial Activity of Allium sativum on Common Food Poisoning Bacteria
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljamb.com/index.php/JAMB/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Please add taxonomic table of allium sativum. You mention food poisoning bacteria in your paper. However, you never mention any antibiotics that are used in food poisoning. In my opinion, you should compare the antibacterial activity of an antibiotic(for food poisoning and an aqueous extract of Allium sativum. because there are so many papers on antibacterial activity of allium sativum aqueous extract . Mention need of the study in our introduction part.	
Minor REVISION comments	Please write impressive conclusion.	
Optional/General comments	You can also make a bar graph for MIC and MBC values.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
