

## Review Form 1.6

Journal Name:	<b>Journal of Advances in Microbiology</b>
Manuscript Number:	<b>Ms_JAMB_92677</b>
Title of the Manuscript:	<b>Pathogenic Bacteria Profiles in Street Cooked and Raw Meat from Selected Markets in Entebbe Municipality, Uganda.</b>
Type of the Article	<b>Original Research Article</b>

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljamb.com/index.php/JAMB/editorial-policy> )

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</b>
<b>Compulsory</b> REVISION comments	<p><b>ABSTRACT:</b>  <b>SENTENCE 4:</b> Authors should create another subsection with title as 'Objectives'.  <b>INTRODUCTION</b>  <b>PARAGRAPH 2; SENTENCE 2:</b> Authors should provide reference if the statement is not theirs.  <b>PARAGRAPH 4; SENTENCE 1:</b> Authors could observe end of sentence after the citation [6] and start a new sentence afterwards.  <b>METHODOLOGY:</b>  <b>1.3. SAMPLING:</b> Authors may include the weight of sample collected and indicate if data from different market differs.  <b>1.4. LABORATORY ANALYSIS; SENTENCE 2:</b> Names of media used for isolation need not be in same sentence with tests performed. Hence it is necessary to move the text (TSI agar (Cat. no DM224D, Gentaur, UK), SIM agar (Cat. 1514, Sigma Aldrich, Germany)) highlighted in yellow, to the point where names of media were mentioned. Also, tests such as Catalase, Citrate, etc, need not manufacturer's address.  <b>RESULTS</b>  <b>3.1. ISOLATED BACTERIA SPECIES:</b> In this section, authors should indicate if the data so presented refers to cooked or raw meat.  <b>DISCUSSION</b>  <b>PARAGRAPH 1:</b> Further information regarding how this result/data compares/relates with data of previous researchers on similar topic is important.  <b>REFERENCES</b>  <b>Authors should ensure proper reference following pattern of journal. An example is given below using item 1:</b>                      Elsharawy, N.T., A. Ahmad, and H. Abdelrahman, Quality assessment of nutritional value and safety of different meat. Journal of Food: Microbiology, Safety &amp; Hygiene, 2018. 3(132):1-5. <a href="https://doi.org/10.4172/2476-2059.1000132">https://doi.org/10.4172/2476-2059.1000132</a></p>	
<b>Minor</b> REVISION comments	<p>Authors should correct texts highlighted in yellow ink.                      Authors should do away with texts highlighted in red ink as suggested in the returning manuscript.</p>	
<b>Optional/General</b> comments	<p>Authors have done a nice project in identifying a major source of food borne illness in a region and calling the attention of local authorities to the issue. However, inclusion of aerobic plate count would have enriched the research the more.</p>	

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</b>
<b>Are there ethical issues in this manuscript?</b>	<b><i>(If yes, Kindly please write down the ethical issues here in details)</i></b>
