PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	English language editing is compulsory, beginning with the title, which should be: "A CLINICOPATHOLOGICAL AND SURVIVAL ANALYSIS OF NON-SQUAMOUS CERVICAL CANCERS AT AHPGIC", with the full name of AHPGIC How do you define "early" invasive carcinoma in the parameters? Invasion in this location does not define an early cancerous spread, but rather an aggressive, extensive one.	
Minor REVISION comments	I would advise on citing newer literature data, with similar pathology or parallel pathology: 1. Tsuji, K., Shimada, M., Takahashi, F. et al. Clinico-pathological characteristics of patients with stage IB1–IB2 (FIGO 2018) uterine cervical cancer: a nationwide study in Japan. Int J Clin Oncol 26, 1541–1552 (2021). https://doi.org/10.1007/s10147-021-01938-4 2. Rebegea LF, Firescu D, Anghel RM, Gales L, Ilie AM, Dumitru ME, Craescu M, Niculet E, Tatu AL, Cretu MS, Cretu MS, et al: Clinical, histological and therapeutical aspects in the management of uterine and extrauterine stromal sarcomas: Case reports. Exp Ther Med 22: 1456, 2021 3. Jicman (Stan) D, Niculet E, Lungu M, Onisor C, Rebegea L, Vesa D, Bezman L, Bujoreanu FC, Sarbu MI, Mihailov R, Mihailov R, et al: Nasopharyngeal carcinoma: A new synthesis of literature data (Review). Exp Ther Med 23: 136, 2022	
Optional/General comments	I would advise a more uniform approach to writing an article, as not even the font or font dimensions are kept throughout the article. Important editing measures need to be taken.
