PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> - The authors should add the study design (A comparative cross-sectional study) in their title. - The abstract section should be modified (No background, aim of the work should be (objective of the study), study design & place and duration of the study should be incorporated in the methodology section of the study) - In the methodology section; the authors used two groups (Group-A diabetic patients, Group-B healthy individuals). The samples were used for Group-A (60) and Group-B (20). It is difficult to compare these two groups and the findings were also not representative. The case-to-control ratio should be 1:1. - The article sections were not written per standard protocol. The authors should modify the sections per standard article protocol. - The authors should elaborate on ways they used to reduce or control confounding factors since cognitive impairment is affected by several variables or factors. 	
Minor REVISION comments	<ul style="list-style-type: none"> - The authors should incorporate a recommendation section based on their findings - The authors should remove (This paper was submitted to the Faculty of Medicine, Tanta University, in partial fulfillment of in partial Fulfillment for the Requirements of the M.D. Degree in Psychiatry) from methodology section 	
Optional/General comments	<ul style="list-style-type: none"> - The authors should standardized the article protocol. 	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
