### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Sickle cell anemia is a rare disease that mostly affects the population in sub-Saharan Africa and the Mediterranean region. Considering the increased migration, this disease is gaining importance all over the world, especially in Europe and the USA. The topic is especially interesting for endocrinologists, gynecologists and pediatricians and others who deal with the growth and development of women. The article is also interesting because it sheds new light on diseases that we don't think about in routine practice and which may become more prevalent in the future. The choice of topic is original, the material is sufficient for obtaining relevant data and drawing conclusions, the method of work took into account all factors that can affect the results of the study. The references, to which the authors refer, are numerous, which indicates the systematic nature of the research. I believe that the mentioned article is excellently written, that there are no scientific shortcomings and that it is ready for publication in its original form.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
