### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljammr.com/index.php/JAMMR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"><li>- For selecting the patients, how was the randomization done? It must be noted.</li><li>- English must be improved (for example: <i>antigen hair follicle</i> should be changed to <i>hair follicle antigen</i>)</li></ul>	
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"><li>- It would be better to be done as a multi-center study; you can mention it as a limitation of this study.</li><li>- The examination was done by a dermatologist or related assistants? It should be noted.</li><li>- "Atopy was reported in 46% of patients in a study of 513 AA patients in the USA (26) which is a relatively high finding." How do you justify the difference of race between the two studied populations (USA and Libya), regarding the prevalence of atopy? You would better to use a study with similar population to yours.</li></ul>	
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
