Manuscript Number:	<b>Ms_JCTI_92156</b>
Title of the Manuscript:	<b>Management outcome of Multi-site keloids of multiple aetiologies in a young female Nigerian: A Case Report.</b>
Type of the Article	

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljcti.com/index.php/JCTI/editorial-policy> )

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"> <li>- The statements of <b>introduction</b> section are not referenced. Mention the references please.</li> <li>- "After closure of the wounds, the edges were immediately injected with three ampoules (40mg/ml) of triamcinolone acetonide." How was the cortico-steroids injected? (sub-qutaneous, intra-dermal,...)</li> <li>- The process of wound healing can be latened by injection of cortico-steroids which results in making scares on the surgical sites. How do you justify it?</li> <li>- Number of the figures need to be re-arranged in order to the text.</li> <li>- "Skin wounds with delayed healing, burns, open biopsy procedures, acne, chickenpox, BCG vaccination, ear piercing increase the chances of keloid formation. Parts of the body with increased predilection for keloids include ear lobes, sternal area, cheeks, shoulder and upper limbs" Mention the reference please.</li> <li>- "The gold standard of management outcome is the occurrence and frequency of recurrence which is the main problem in keloid management" Mention the reference please.</li> <li>- "The consensus is that surgical excision alone is not sufficient to either prevent or reduce drastically recurrence, it has to be combined with other treatment modalities." Mention the reference please.</li> <li>- "The triple regimen of excision, radiotherapy and triamcinolone has been found to be very effective in terms of recurrence." Mention the reference please.</li> <li>- "Surgical excision alone has the highest recurrence rate and its combination with other management options gives low recurrence rate." Mention the reference please.</li> <li>- English grammar seriously needs to be improved.</li> </ul>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
