General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljemt.com/index.php/JEMT/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is important that the research objective is not diluted and that it is always in evidence, especially in the abstract and introduction.	
Minor REVISION comments	Although the manuscript has relevant information, it is a bit confusing. As the amount of data is voluminous, it would be interesting to have a synthesis so that the reader does not get lost, perhaps a table with the main findings. Another important point that should be mentioned is the details of the methodological paths. For example, how many completed questionnaires were validated, how many were excluded and who are "all operators". Just rewrite to make your ideas clear.	
Optional/General comments	Great job!	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
