

## Review Form 1.6

Journal Name:	<a href="#">Journal of Geography, Environment and Earth Science International</a>
Manuscript Number:	Ms_JGEESI_88508
Title of the Manuscript:	Waste Management in the Oil and Gas Industry in Guyana: A Qualitative Study
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljgeesi.com/index.php/JGEESI/editorial-policy> )

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments 强制修订意见	<p>1.The manuscript is written not in a style of journal article but of report. So, it should be revised in a journal article style, which includes normally the following main parts: introduction, materials and methods, results and discussions, conclusions.</p> <p>2. In the introduction, the author should briefly introduce the importance and necessity of environmental protection problems and solutions involved in this paper, the difficulties of related technical and management problems, the experience and contributions of other countries and other researchers, and this paper focuses on the problems, solutions and contributions of the report. In the part of materials and methods, the author should focus on the qualitative research scheme of waste management adopted in this paper, the types and sources of waste management data in Guyana's oil and gas industry, and the methods of data acquisition, collection, processing and analysis, including word text, tables and charts. In the part of results and discussions, the author should focus on the specific detailed data (including word text, tables and charts), qualitative analysis results and discussion of waste management qualitative research. In the conclusion part, the author should further briefly refine and summary the views, methods, achievements, problem solutions and suggestions put forward by the author in each part of this paper, but should not include the achievements of other countries and researchers quoted in the paper.</p> <p>3. The abstract should be revised based on the above revision which concisely and accurately describes the basic elements of the paper include research purposes, methods, results and conclusions.</p>	
<b>Minor</b> REVISION comments	<p>1."Guyana's coast supplies the country with water."— The reference of this formulation is not clear enough. It is needed to explain whether the supply of fresh water come from seawater desalination? Or from inland rivers, lakes and reservoirs? Is marine-culture and fishing the local food and economic source? The pollution of sea water and coast will bring marine ecological disasters and adverse effects on people's health.</p> <p>2. It is necessary to supplement the channel with high traffic density of maritime ships, including analysis methods, data sources, relevant management countermeasures, problems and suggestions.</p> <p>3. In addition, Guyana's regulations and standards on waste management in the oil and gas industry and the specific implementation of relevant enterprises need to be supplemented.</p>	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
