

**Editor's Comment:**

I have thoroughly assessed the manuscript based on the review comments from the reviewers as well as the author response files. Find the final file attached. My decision is to **Accept with minor revisions**. These further revisions need to be made:

1. Fig. 5: Histogram of the total lineament of the study area. The image is not visible
2. The manuscript should be proofread thoroughly to fix its syntax and grammatical errors.
3. In the conclusion, add further areas of research.
