### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	The study about chemical contaminants and its influence on operation of waste water treatment plant is an important contribution for protecting soil and water resources in Cameroon. Disinfectants and cleaning products are the primary and others are with varying degrees of Contaminants. The objectives are clearly illustrated. The methods used for analysis of water and sludge samples are found to be scientifically proven and standard tests. Solubility in water, danger proneness are also studied. Physical, chemical properties of samples were analysed. Quality of anaerobic sludge and dry matter was also analysed. This study has clearly demonstrated the waste water treatment plant and influence of chemical constituents on operation of a plant. It is a worthy research article.	

### PART 2:
