PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>In this study, 95 patients received the formulation containing benzoic acid 20mg, salicylic acid 20mg and metallic iodine 2.5mg per ml (Group A) had daily for 13 weeks and Group B with 95 patients received Verrux® (salicylic acid 165mg, lactic acid 145.2mg per ml of collodion) daily for 13 weeks (group B). After finishing the 13 weeks of treatment, total regression of the symptoms (markedly improved) was observed in 100% of the subjects of the group A. The study is meaningful with these results and is valuable for publication. I think it will be even more valuable if the authors explain whether there is a cost difference between the two groups.</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
