PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is a descriptive cross-sectional study on the quality of life of patients with post-covid-19 syndrome. The sample is small, which makes external validity difficult. The authors should send as complementary material: the validation schemes of the questionnaires and the questionnaires themselves. In the discussion, some of the items of the questionnaires should be compared with the results of quality of life of other pathologies such as addictions or heart failure. For this I recommend reading: Fernandez Rodriguez V, Fernandez Sobrino AM, Lopez Castro J. La calidad de vida desde la perspectiva de las adicciones [Quality of life from the perspective of addiction]. Rev Calid Asist. 2016 Jan-Feb;31(1):3-9. López Castro J, Cid Conde L, Fernández Rodríguez V, Failde Garrido JM, Almazán Ortega R. Análisis de la calidad de vida en pacientes con insuficiencia cardíaca mediante el cuestionario genérico SF-36 [Analysis of quality of life using the generic SF-36 questionnaire in patients with heart failure]. Rev Calid Asist. 2013 Nov-Dec;28(6):355-60.
