PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Well written manuscript. I would like you to address the following points though: <ol style="list-style-type: none">1. Studies have reported post-covid patients to have persistent symptoms and impaired QoL. Please give references here.2. Kindly put the full forms of MH, SH and LOHS in the table itself for clarity.3. 2.1 Study Design & Participants: How long after recovery from COVID infection were participants included in the study? Was there any criteria for this? As this would affect the QOL. It would be better if you could add this variable in your analysis. A person who has just recovered from COVID and a person after a year of COVID would have different QOL.4. The mechanisms leading to impaired physical functioning are multifactorial and arise as a consequence of the infection. Please add a reference for this paragraph.5. This could be bidirectional: persistent physical symptoms may lead to psychiatric illness, and disturbed mental health could manifest as physical impairment. Additionally, the coronavirus may directly cause psychiatric complications through cerebral infection or hyperinflammation. Please add a reference for this paragraph.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
