Compulsory REVISION comments	<p>The authors present their retrospective manuscript with regard to the effects of Sacubitril/Valsartan in patients with CHF. My comments are as follows:</p> <ul style="list-style-type: none">- I think a structured abstract would be better for this original article- The 'nonischemic' etiology is responsible for 60% of the cases. Is there a subgroup analysis of these patients? Do the authors have any comment on valvular etiologies and their effects on the sizes of the cardiac chambers?- Are the patients with a history of cardiac surgery excluded?- Are the patients with IHSS/HOCM excluded? <p>Thank you</p>
