Accepted after Minor revision

In Abstract and wherever it is mentioned, Not say selling the heritage or historical tourist attractions. Or put the word into brackets, or use the term provide , because we are dear with attractions\$ buildings, temples, wonderful scenery....

In Conclusions, to be mentioned the benefits of the so-called selling the tourist attractions in the 7 locations mentioned.

And, of course, what to do next for the improvement of the attraction of more tourists.

The references are not to be written with figures in the brackets, but with the name of the author and, in round brackets, the year of publishing.

BUT, the main problem is the References part: the authors have to be written in alphabetical order of their last names and, immediately after the name (s) the year of publishing and the rest. For example, the first one is Adi, S. W..... (2017).....

and the last one is Widyawati, C. (2018).....
