

Editor's Comment:

This is with reference to editorial decision on manuscript as cited below. The initial draft of the manuscript had methodological inaccuracy, analytical incongruence and grammatical mistakes. The third revised draft of manuscript still has problem with referencing style as it does not conform to APA 7th style. It needs editing as per respective referencing style.

Based on findings of peer review report, the manuscript seems modified in its third draft on parameters as highlighted above. It may be recommended for publication in this journal.

Editor's Details:

Dr. Neelmani Jaysawal,
Assistant Professor,
Visva-Bharati University, India.
