If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	Off course, It is very important . Yes,It is fairly suitable . Yes It is very comprehensive and at the same time to the point. Yes, except for that it doesn't include in the Investigations any referral to the use of peripheral immunophenotyping although the biopsy is sufficient but for confirmation issues. Yes, it is scientifically correct. There are some other references to be added in terms of masses mimicking malignancy 1- :Pacyna RR, Cipriani NA, Mathew MS, Kim JS. IgG4-related disease mimicking gynecologic malignancy. Gynecol Oncol Rep. 2023 Jan 18;45:101137. doi: 10.1016/j.gore.2023.101137. PMID: 36714372; PMCID: PMC9879761. 2-Renal Cell Carcinoma Mimicking Igg4-Related Pseudotumor in Autoimmune Pancreatitis Muhammad Ali Khan1, Sehrish Kamal1, Usman Ahmad2, Mohammed Andaleeb Chowdhury1, AliNawras2.JOP.J Pancreas (Online) 2014 Sep 28; 15(5): 520-522 1Internal Medicine and 2Gastroenterology, University of Toledo, Toledo, Ohio, USA	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Check language for the whole article	
Optional/General comments I personally recommend such reports due to the diversity character of the IgG4 -RD	Follow author guidelines
