

Review Form 1.7

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_98464
Title of the Manuscript:	Dynamics of Pests, Natural Enemies and Pollinators of <i>Lycopersicon esculentum</i> Mill and Correlation with Weather Parameters
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The choice of topic on "Dynamics of Pests, Natural Enemies and Pollinators of <i>Lycopersicon esculentum</i> Mill and Correlation with Weather Parameters" is relevant and helpful for scientific as well as farming community. This article emphasizes on record of different major pests of tomato i.e, tomato fruit borer, serpentine leaf miner, whitefly and minor pest as flea beetle. In addition to that population of natural enemies and pollinators were also recorded. The fluctuation of pest, natural enemy and pollinator population was observed in relation to different weather parameters like temperature, relative humidity and bright sunshine hours. This correlation data between weather parameters and pest population on the crop tomato, can help the scientific community to take advance steps for pest management during fluctuation of environmental conditions and can motivate the researchers to explore further in these areas.</p> <p>Thus, I suggest this article on "Dynamics of Pests, Natural Enemies and Pollinators of <i>Lycopersicon esculentum</i> Mill and Correlation with Weather Parameters" to be published in the International Journal of Environment and Climate Change .</p> <p>yes It can be more comprehensive. Yes Yes Additional more recent references if available, then it has to be added to enhance the quality of manuscript.</p> <p>Only minor revision is required on following aspects: Text: Studies can be supplemented with some field photos for improving the quality of research paper.</p> <p>Reference- Population fluctuation of natural enemies and pollinators at different SMW during 2020-21- in this part if available reference to be added. Follow the new reference style of the journal.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p>(If yes, Kindly please write down the ethical issues here in details)</p>
