| <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p> | <p>AVM is a rare diagnosis. Management guidelines are yet not available. More Work on AVM is required to get into the insights of managing such cases.</p> <p>Majority of the cases of AVM mentioned in the literature are post D&C. Rarity in terms of presentation, diagnosis or management encountered which makes it unique could be incorporated in the title.</p> <p>Abstract is comprehensive. Presentation in terms of severity could be included in the abstract.</p> <p>Structure and sub-sections are appropriate. More emphasis is advisable on the presentation and follow up.</p> <p>Advised to incorporate some recent studies.</p> <p>References are sufficient but could be more recent.</p> <p>I would appreciate the Author for choosing an interesting case-report. My suggestion would be to emphasise on the severity of AVM,. Why UAE was chosen as management option and not the medical management. Pregnancy follow up, if available, should be incorporated in the case-summary.</p> | |
| Minor REVISION comments | | |
| 1. Is language/English quality of the article suitable for scholarly communications? | Manuscript needs slight corrections in terms of abbreviations used. Refinement of language would be much appreciated. Introduction part also needs elaboration. | |
