

Review Form 1.7

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	Ms_ARJOM_98744
Title of the Manuscript:	An Error Analysis of Implicit Finite Difference Method with Mamadu-Njoseh Basis Functions for Time Fractional Telegraph Equation
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	1 - Yes, the manuscript presents a solution to a linear time-fractional telegraph equation using the Mamadu-Njoseh Polynomials, recently introduced in the literature; 2 - Yes, the title is appropriate; 3 - Yes, it is understandable; 4 - The conclusion topic apparently was supposed to be topic 7. It is written as topic 5. 5 - The structure of the text seems coherent, although there are some symbols that are not specified in the text, such as " H_0^1 " and " H^2 ". The results presented were checked with reference [11], showing relatively minor errors, suggesting that the method is plausible. 6 - The bibliographic references could be more up-to-date, but it is understandable that some older references were included to provide a basis for the presentation of the theory of the application of the Mamadu-Njoseh Polynomials. 7 - In the text: Using (1.10) on (1.9), "we obtain a new implicit implicit scheme given by", "implicit" is repeated.	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Yes;	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
