(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes, this manuscript is important for the scientific community. It proves, once again, that IPCC plays a key role in bringing the issue of climate change to the attention of policy-makers and media all over the world. It underlines that IPCC also gives hope for communities (in this case, from Mexico) for a better health, since climate change affects it directly.</p> <p>2. Yes 3. Yes 4. Yes 5. Yes 6. Yes</p> <p>Children, low- income people, persons with disabilities, pregnant women, minorities, groups living in locations that are prone to climate related health hazards are seriously affected by effects of climate change on human health. I appreciate the fact that authors issue an warning about social vulnerability aspect of this situation.</p> <p>In this respect, since a country has different development zones and zones of different risks, it would be interesting for the reader to find out which are these zones located in Mexico.</p>
