Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	Partially No (A case of highly located thyroglossal duct cyst) No No Yes Yes	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	No	
Optional/General comments	1-The presented case does not have sufficient clinical examination and imaging findings for the differential diagnosis of a laryngocele case. For this reason, the theme of "masquerading as a laryngocele", which constitutes the title and main idea of the manuscript, should be changed. 2- In the conclusion part, it was stated that the differential diagnosis of thyroglossal duct cyst should be made intraoperatively. However, it should be noted that the diagnosis should be made with preoperative examinations in order to perform appropriate surgical treatment.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
