

Editor's Comment:

As the authors did not indicate the location of the alterations in the text (emphasis, colors) it becomes difficult to detect them. But, compared to the original, it looked exactly the same paper, with no corrections, just the name change to 'revised paper'.

Therefore, based on the reviewers's notes (not followed by the authors), I do not recommend the paper.

Authors should really make all adjustments suggested by reviewers (point by point) and mark them in the text. Then they must return the paper to the reviewers (or they can rewrite the paper and make a new submission).

Suggestions:

In the feedback to the authors, please answer what was actually done, and prove it in the text with the tags.

All the corrections must be marked in the text to facilitate the localization.

Delete the part of title: 'Research of' - Unnecessary.

Title Suggestion: "Natural Killer Cell (CD56+, CD16+, CD3-) and It's Activating Ligand (CD 112) in Acute Myeloid Leukemia".

Editor's Details:

Dr. Sandra Aparecida Marinho
Professor, Paraíba State University (Universidade Estadual da Paraíba - UEPB), Campus, Brazil.
