

**Editor's Comment:**

After having scrutinized the Peer Review documents for the manuscript titled "Quantifying the Environmental Impact of Standard Gauge Railway (SGR) on Land Cover Changes along the Nairobi-Kiambu Corridor: A Geospatial and Field-Based Investigation" I saw that the manuscript has been reviewed by three different reviewers. All the reviewers have accepted the paper with high scores. Therefore, the manuscript can be accepted for publication in the Journal of Geography, Environment and Earth Science International.
