PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. The article is enough informative - in terms of presenting new information and in consolidating background information. Considering the needs and interests of a typical reader, in my opinion this article is adequate and it could contribute to the knowledge already published in this field.</p> <p>2. The title is clear, grabs attention, accurately describes the contents of the manuscript, and makes people want to read this article. Also the title is effective because it convey the main topics of the study.</p> <p>3. The Abstract and Keywords sections are relevant and adequate.</p> <p>4. The introduction summarizes the background information and purpose of the research. The purpose is clearly and concisely stated; The experimental and theoretical methods are described comprehensively.</p> <p>5. Results are discussed and interpreted in relation to other important bibliographic titles on the topic area of the study. Discussions are pertinent and they mention recommendations based on the findings of the present study. The discussion interpretations and conclusions are justified by the results of the study.</p> <p>6. The bibliographic titles are recent and relevant for this article. References respect the journal's criteria (with minor mistakes in writing like brackets, space, dots and commas).</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The paper is written in an understandable style. The language is fluent and accessible for all types of readers (specialists or common people). The adopted writing style is correlated with the purpose of explaining and communicating ideas, also engages with the intended audience.</p> <p>The description and discussions of the Figure 1 and Figure 2 are missing from the text of the manuscript. Also, the phenotypic diagram and the genotypic diagram are not numbered as figures.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
