

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_91298
Title of the Manuscript:	Effect of Maize and Chickpea Intercropping under the Different Row Ratios on Air Temperature and Vapoure Pressure Profile in Crop Canopy
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> Review the study title, "Effect of Maize and Chickpea Intercropping under the Different Row Ratios on Air Temperature and Vapoure Pressure Profile in Crop Canopy" to include study location, "Anand (Gujarat), India". Review the abstract to include study background, results and conclusion in a precise manner. The introduction should serve as a background to this study, citing similar experiments carried out and the results, and then finding a gap which the present study intends to fill. Review the section on introduction. Review the section on Materials and methods. It may be important to have some small sub-sections on study site, methodology, data collection and analysis. Review section on Results and discussion. First present the findings of your study, followed by a discussion and a comparison to the findings of similar studies carried out by other scholars. What are the new findings that this study adds to the current body of literature in this area? How does this study become important to farmers in "Anand (Gujarat), India"? What are the implications for policy makers in the area of agriculture? What are the other important areas that this study finds important for investigation, but due to the current limitations they could not be addressed..... recommendations for further research. The references given under this study are very few for such a study. Some are also very old and may not reflect the latest information on the subject under study. Review the references to include some recent studies on the subject. There was insufficient literature review under this study. 	
Minor REVISION comments	<ol style="list-style-type: none"> There are a number of minor issues to do with final editing of the manuscript which the Researcher should pay attention to. This is a good study and after all corrections mentioned here in are attended to, the Editor should consider this manuscript for publication. I want to thank you for having chosen to publish with our <i>International Journal of Environment and Climate Change</i>, and look forward to seeing more papers from you. 	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
