

Review Form 1.7

Journal Name:	Asian Journal of Biochemistry, Genetics and Molecular Biology
Manuscript Number:	Ms_AJBGMB_98055
Title of the Manuscript:	Haematological indices of experimental rats fed with rat chow fortified with processed breadfruits.
Type of the Article	Research article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajbgmb.com/index.php/AJBGMB/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. The manuscript is very important for scientific community. Herbal medicines have received greater attention as alternative to clinical therapy in recent times leading to subsequent increase in their demand. Research work on medicinal plants have shown that they have definite action on nervous, circulatory, respiratory, digestive and renal systems; as well as sexual organs, the skin, vision, hearing and taste. <i>Treulia Africana</i> has been shown to contain flavonoids, polyphenols, polysaccharides, cardiac glycosides, saponins and anthraquinones which are known to have antimicrobial activities. A study revealed that the bark extract of <i>Treulia Africana</i> is capable of stimulating red blood cell formation and an active phagocytic agent against foreign compounds and may be useful for haemopoietic conditions.</p> <p>2. The title of the article is satisfactory.</p> <p>3. Abstract of the article is also satisfactory.</p> <p>4. The subsections and structure of the manuscript are NOT appropriate. The "RESULTS" and "DISCUSSION" section should must be divided into subheadings to enhance the visibility and clarity of the article.</p> <p>5. Scientific analytical procedures are missing in this article. Hence it's not scientifically very sound. The author should have must be give details of each analysis with proper citation.</p> <p>6. The references are not sufficient. There is scarcity of citations especially in "Method" and "Discussion" sections. Authors must have to write all protocols in sufficient details and citations in "Method" section. Also there is a great need to add more citations in "Discussion" section to strengthen the results. There would be require a strong discussion.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>English language quality is not satisfactory. It is suggested that author should avail native language editor services to improve the quality of the language.</p>	
<p>Optional/General comments</p>	<p>Check grammar and spells</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
