

Editor's Comment:

This paper is not quite ready for publication. There are a few items to be adjusted.

1. The paper should be sent to a professional editor to fix numerous spelling and grammar errors in the paper. If the authors lack resources to do this, at the very least have a trusted colleague well-schooled in the English language review the paper and suggest changes.

2. Some of the text boxes in Diagram 1 and Diagram 2 are difficult to read. Please resize the diagrams so that

all of the text in the diagrams is easier to read.

3. Section 6 (Materials and Methods) and Section 7 (Ethical Considerations) should probably be put closer to

the front of the paper, after the topic is introduced but before the bulk of the analysis takes place.
