Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Quality of life (QOL) of older adults has become an important public health issue, because of demographic changes resulting from the ageing of the population. Moreover, studies have suggested that QOL scores of elderly people are different from that of the general population. The objective of this study was to determine whether there was any association between depression and quality of life among the urban elderly during the COVID-19 pandemic.</p> <p>The findings of the study were presented by frequency, percentage, mean and standard deviation and tables of the ANOVA, independent t-test and correlation interpreted with statistical information. This study was conducted to assess whether or not there was any association between depression and quality of life among the urban elderly of Dhaka city during the COVID-19 pandemic.</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 		
<p>Optional/General comments</p>	<p>It is a good piece of work May be accepted for publication</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
