

Editor's Comment:

I have read the text of the manuscript, the reviewers' reports, and a revised version of the text of the manuscript.

I consider the topic of the manuscript relevant. The research results have scientific and applied value.

At the same time, the text of the manuscript does not fully meet the requirements for its design. Authors should check the correctness of the design of their manuscript. In particular, this applies to the design of the names of tables and figures (a period is required, not a colon; the word "Figure" must be replaced by "Fig.").

Thus, I believe that after taking into account the listed remarks, the document on the topic "Improvement of Papaya (*Carica papaya* L.) Seed Germination, Seedling Growth and Chlorophyll Content by Using Growing Medium and Organic Liquid" can be published in the International Journal of Environment and Climate Change.
