

**Editor's Comment:**

To ensure a better quality of published articles, the authors of this article must follow the suggestions of the evaluators, after corrections, it must be evaluated again for a new opinion of the editors. The assessment of Dr. I Nengah Muliarta, S.Si., M.Si and Ngangom Nonglen Meetei was more accurate and adequate, the authors of the article should pay attention to the suggestions of the evaluators. The article is not suitable for publication, corrections are necessary according to the requests of the reviewers.
