PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes, extremely relevant as it addresses economic issues and agribusiness.</p> <p>2. The title is adequate, but I suggest that you direct the research to demands and offers in a global context, and also list the largest producers of this item, with prices applied to understand their demand and supply, relating this to the country's domestic production. Check the impact on the national and international economy, such as income generation, employability and external production, to become competitive in the globalized world. Also point out the main producers and prices to be practiced and challenges to maintain the culture and internal production in agriculture of this item. Proposing the importance of this crop, promoting it for the less favored classes, encouraging a large production with centralized logistics.</p> <p>3. It will be adjusted to accommodate the suggested proposal</p> <p>4. Ok, but it will need adjustments to better present the research topic, such as economic impacts, demands and advantages of peanut production, such as harvest, growing period, etc.</p> <p>5. Yes, but it will need to go through the inclusion of other constructs, such as production, logistics, environment and demand and supply of the peanut itself in world order and its impact on the international market and especially the national one, in this case.</p> <p>6. will need to cover these new suggested constructs.</p> <p>The article considering the suggestions will have greater coverage and will present the economic aspects and advantages and disadvantages of cultivating peanuts on a large production scale.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	OK	
<p>Optional/General comments</p>	N/A	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	(If yes, Kindly please write down the ethical issues here in details)
