(If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. (Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)	Yes this study can help community scientifically as gout is one of the most frequent pathology. Topic is good for the Article. Yes, abstract is comprehensively written accordingly. Overall the outlay of manuscript is excellent. I think ultrasound can only help in advanced cases of gout as it early stages The findings can be very subtle and require skillful hands. Moreover there are too many joints Diseases in which the early or acute phases can mimic gouty arthritis, so it would be difficult to diagnose on ultrasound only if there is hyper uremia. Yes the reference are up to the mark. This article is worthy and it should be published if minor changes are made that is ultrasound can help in gout diagnosis in later stages.	
Minor REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Yes its good.	
Optional/General comments	NONE	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
