

## Review Form 1.7

Journal Name:	Asian Research Journal of Mathematics
Manuscript Number:	M_ARJOM_104225
Title of the Manuscript:	Pointwise Clique-Safe Domination in the Complement and Complementary Prism of Special Families of Graphs
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalarjom.com/index.php/ARJOM/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>1. This study investigates the concept of pointwise clique-safe domination in the complement and complementary prism of some special families of graphs. It aims to generate some observable properties of pointwise clique-safe domination in those special families of graphs and obtain their corresponding pointwise clique-safe domination number.</p> <p>2. The title of the paper is adequate.</p> <p>3. The abstract is not complete.</p> <p>4. The article is well-structured.</p> <p>5. In this study are generated some properties of the parameter and characterized the minimum pointwise clique-safe dominating sets of the complement of some special families of graphs and their complementary prism. The parameter introduced in this paper may be explored further to address some relevant problems as done in other research works. OK!</p> <p>6. The literature is contemporary but could be more rich.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1. Some misspellings and long sentences.</p>	
<p><b>Optional/General</b> comments</p>		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p>(If yes, Kindly please write down the ethical issues here in details)</p>
