Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>		
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 		
<p><u>Optional/General</u> comments</p>	<p>The article adds to several published on apparently immunocompetent people, and we must consider the susceptibility of the host, the size of the inoculum, and the exposure time as factors that could have contributed to the infection. Although we do not know them in this case, they are factors that influenced.</p> <p>Regarding the comment that less fungemia is observed in immunocompetent patients, bibliographic support is required in this regard, and in this case the fungemia involved several organs.</p>
