

Review Form 1.7

Journal Name:	Asian Journal of Fisheries and Aquatic Research
Manuscript Number:	Ms_AJFAR_102351
Title of the Manuscript:	RELATIONSHIP BETWEEN FEEDING REGIME AND FISH GROWTH
Type of the Article	Minireview Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**Lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u>	Yes, this information can help fish farmers increase their yields Yes Yes Yes, but it needs to be supplemented with a more detailed discussion on determining the composition and type of fish feed before determining the FEEDING REGIME and it is necessary to add the amount or weight of feed naturally compared to farmed fish; Types and mechanisms of digestive enzyme activity that play a role in accelerating the degradation of certain feed compound composition (proteins, lipids, carbohydrates); explanation of stress conditions that affect the ability to eat and growth of fish; also the relation of composition and amount of feed to all hematological parameters in detail. Likewise, the factors that influence fish growth are very simple. A more detailed and complex discussion is needed to show the relationship between food restriction and fish growth. The data in the table is too simple, it needs to be added again for the types of fish, especially fish that are raised for their meat or ornamental fish that are cultivated. Yes Reference should be 10 years from now, and more libraries need to be added to support it.	
<u>Minor</u> REVISION comments 1. Is language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments	Manuscripts need to be completed	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
