EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>Introduction: Good but the objective of the study does not appear in the summary. Authors can do it in the introduction of summary.</p> <p>Methodology: please authors can indicate the number of sample, the site and duration of the study. After conclusion, we need Practical Applications of the study.</p> <p>Key words: there are many dependent variables. If authors consider α-amylase and αglucosidaseas</p> <p>key words, they must put also, minerals and amino acids, so why my</p> <p>Introduction: the authors have developed this part well. They posed the research questions well.</p> <p>Materials and methods: need paragraph for sampling. Indicate the number of samples obtained. What were the sampling methods?</p> <p>Results and Discussion: after table 2, I suggest that the authors number the tables as follows:</p> <p>Table 3 instead of table 3a, table 4 instead of table 3b and table 5 instead of table 3c.</p> <p>References</p> <p>The references are good and in accordance with the study. However the reference below is</p> <p>too old, refresh it, if there is an updated document.</p> <p>[21] "Hernandez H, Lynn H, Bates S. A modified method for rapid tryptophan analysis of maize CENTRO Internacional Oe Mejoramiento De Maiz Y Trigo International Maize Ano Wheat</p>	<p>The previous aim of the study has been clearly modified under the "Abstract" and "Introduction" sections.</p> <p>The number of samples has been indicated.</p> <p>The site and duration of the study have been indicated in "Abstract" sub-section, "Place and Duration of Study".</p> <p>The conclusion already indicates the practical application of particular flour blends studied in managing type-2 diabetes.</p> <p>Keywords have been corrected to include amino acids and to exclude α-amylase and α-glucosidasea</p> <p>Thank you.</p> <p>Each sample preparation shows the method of sampling and the number of samples prepared.</p> <p>Tables 3a, b, c have been renamed as Tables 3, 4 and 5 respectively.</p> <p>We have removed reference no. [21]. Reference no. [20] is sufficient as a reference for the methodology.</p>

Improvement Center Mexico. 1969”.

Also 47 references for an article is too much. Authors can reduce the number of references to have a maximum of 30 references.

We have cited and listed all the references consulted in order to avoid being penalized for plagiarism. We, therefore, humbly wish to leave the sources cited and listed in our manuscript.
