Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalajaees.com/index.php/AJAEES/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Title of the paper may be appropriately changed as "Livelihood Security of Agricultural Labourers in Andhra Pradesh" instead of very long title. The second half of the title may be dropped.</p> <p>While calculating Livelihood Security Index score, instead of taking simple average of all the indicators it would be appropriate to calculate Index using the formula;</p> $LSIS_i = \frac{\sum_{j=1}^9 X_{ij}}{MAX [\sum_{j=1}^9 X_j]} \quad i=1.2.3.....n \text{ no. of samples}$ <p>Where X_{ij} = actual score of ith respondent to jth indicator. Max X_j = Maximum score permissible to Jth indicator. The simple average taken by the author's results in taking average of average which is not correct.</p> <p>Authors to re –calculate the livelihood security index and make necessary post-classification as low, moderate and high as done by the authors. re-working out of some Tables are necessary</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	-	
<p>Optional/General comments</p>	-
