

**Editor's Comment:**

Yet, as relevantly required by one Reviewer, the list of yield attributes taken in consideration in this study is still missing at the end of the "Statistical analysis" section. Although this list is evoked further in Results section, I agree with the Reviewer that this list should be briefly given before, in Methods section, in particular in Statistical subsection.

Thus, I strongly invite the Authors to add this piece of additional information in Methods section.

When this is done, the manuscript, can be considered as ready to be accepted for publication in IJECC.
