

### **Editor's Comment:**

I have read the text of the manuscript, the reviewers' reports, and a revised version of the text of the manuscript.

I consider the topic of the manuscript relevant. The research results have scientific and applied value.

At the same time, I had some comments about the text of the manuscript, namely:

1. In the abstract, you should decode U.P (Uttar Pradesh) and indicate the country.
2. Authors should check the correctness of the design of their manuscript. Special attention should be paid to the correct design of the names of sections (numbering, etc.).
3. It is worth checking the correspondence of the material presented in the "Discussions" section and the material presented in the "Results" section (in particular, regarding economic indicators).
4. I also recommend checking the grammar. Some sentences could be worded better.

Thus, I believe that after taking into account the listed remarks, the document on the topic "Effect of sulphur and foliar application of thiourea on growth and yield of Cluster bean (*Cyamopsistetragonoloba* L.)" can be published in the International Journal of Environment and Climate Change.
