EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<ol style="list-style-type: none">1. Article is comprehensive but it need numerical key outcomes of the study and its future perspectives, revise and add relevant data.2. The Introduction part is too scarcity and it needs rationale of study and hypothesis on which research was based on. Also add key issues of the problem taken out for research and its comparison with other relevant field study. There need add more sections in this part.3. It has ethical issue as involves the Human study, (2) methodology section missing, (3) Not sound on this data basis4. There should be more references in the paper, add more5. English spelling, grammar and other formatting issues in the paper6. It has ethical issues and also method of study is not reliable and it needs proper mechanism of study and its replication should be seen. English is very poor.	<p>I am writting this to bring your kind attention that this is not a research study .This is just a case study so there is no rationality or ethical issues in this report.In editorial comment it is mentioned that there should be more references we have included maximum references regarding to our study.This case report is rare one and patient specific we could not find any other article relating to this.</p>
