ReviewForm1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes, The manuscript is on the impact of abattoir on the surface water quality of Iwofe River. Overall the manuscript is good.</p> <p>yes</p> <p>No, too many detailed results are mentioned in the abstract, include only significant results. yes</p> <p>yes</p> <p>No</p> <p>APHA (American Public Health Association). (2017). <i>Standard methods for the examination of water and wastewater</i> (23rd ed.). Washington, DC: American Public Health Association.</p> <p>1. The work is done to evaluate the impact of abattoir on the surface water quality of Iwofe River. Port-harcourt, rivers state, Nigeria. There are already many works done in this field earlier in the same state. The author needs to include a more comprehensive review of literature to discuss the earlier works and a proper justification for the present research.</p> <p>2. More detailed location Map is needed.</p> <p>3. The water quality quality index should be determined to evaluate the overall water quality. The author can refer to https://doi.org/10.1080/23570008.2021.1928902 this article for reference.</p> <p>4. In reference section, latest edition of APHA should be cited.</p> <p>5. In addition to that include some recent references</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	yes	
<p>Optional/General comments</p>	Heavy Metal Index can also be calculated for better evaluation of water quality parameters.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
