EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. Author should continue working on the improvement of the discussion element of this study. The discussion of the findings through the lens of previous studies is now missing. This radically degrade the potential contribution of the study to the literature. Also, the conclusion section should be expanded to summarize the novelty of the author's results, contribution of the study to the literature, implications of the findings for policies, as well as the limitations of the methodology and potential future research directions.</p>	<p>Thanks for the correction. I have enhanced the discussion element of this revised paper by adding more explanatory sentences. And also I improve the conclusions of this study by adding explanations so that the results and findings of this study become clearer. Thank you very much for your review of this paper so that this paper becomes better.</p>
