

Review Form 1.7

Journal Name:	Asian Journal of Education and Social Studies
Manuscript Number:	Ms_AJESS_104796
Title of the Manuscript:	DIGITAL-BASED PHYSICAL EDUCATION, SPORTS, AND HEALTH VISUAL LEARNING MEDIA DEVELOPMENT FOR DISABLE STUDENTS
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The article addresses an important theme in any educational or social context, and it is a current theme. The article needs major improvements. I recommend publication with major revisions. The recommendations for improvement are the following:</p> <ul style="list-style-type: none"> • Congratulations for the interesting and current research. • Considering the purpose, focus of the research and the specific population, for greater clarity of the title I propose to reformulate it in "Development of Digital-Based Visual Learning Media for Physical Education, Sports, and Health for Students with hearing impairments". • Different research purposes are presented in different parts of the article. If in the abstract the purpose presented was "focuses on the development of digital-based learning media for individuals with hearing impairments", in the introduction a completely different purpose is formulated: "The object of study in this research is to increase understanding of Physical Education, Sports and Health by innovating digital learning media". It should be a single goal, presented the same way throughout the article. Please correct. • In the introductory part, there are paragraphs whose statements are not supported by scientific evidence, i.e., accompanied by bibliographical references. For example, in the first sentence, "Efforts to improve the quality of educational processes and outcomes are constantly sought, researched, and pursued through the study of various components of education". Please insert in-text bibliographical references when needed. • In the theoretical concepts part, I recommend the introduction of information about the particularities of perception and learning of students with hearing impairments. These specific characteristics are the ones that shape the particularities of the proposed digital platform. • The methodological part is not structured according to research. The presentation of study participants and measurement instruments should be introduced as separate subsections. There is a distinct part for results and another for discussions and conclusions. • I really appreciate the presentation of the platform. Unfortunately, the presentation of the results should be clearer. In the abstract, we were presented with a mixed methodology, with a questionnaire and interviews. The gathered data are only presented in Table 4, very briefly. Some data are presented without support, e.g., "This is reinforced by the results of the data analysis, where 58.1% of pre-test and post-test students expressed interest in the learning applications of physical education, sports, and health for deaf students in special education schools. If this is connected to the theory and framework that have been previously stated, it basically supports the results of this study." I recommend restoring the entire results part. • Because the results are presented briefly and unstructured, and the part of the conclusions seems to contain statements without support in the part of the results obtained. • The conclusion are too short. It would be interesting to add more practical recommendations, and limits of the current study. • There are only 5 bibliographic references in the entire article. A serious research, which can be considered for publication, has a minimum of 30. Please review. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
