

Editor's Comment:

After thoroughly going through the revised manuscript no. Ms_MRJI_102760 entitled "Frequency of HEV antibodies in pregnant women and its association with existent risk factors, Sudan: A cross-sectional study" submitted for publication in Microbiology Research Journal International, I am able to conclude that the manuscript has been revised properly by the authors in response to the comments from the reviewers. I have also seen the response by the authors. The revised manuscript has been improved a lot and thus may be accepted for publication.
