Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> 1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript) 2. Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes. It's a rare tumor and more studies are necessary to optimize treatment</p> <p>Yes</p> <p>Repetations to be avoided in the abstract. Abstract can be made more comprehensive.</p> <p>Yes</p> <p>Yes</p> <p>Tappero S, Sorce G, Hoeh B, Hohenhorst L, Panunzio A, Garcia CC, Piccinelli M, Tian Z, Parodi S, Montorsi F, Chun FKH, Graefen M, Antonelli A, Saad F, Shariat SF, De Cobelli O, Suardi NR, Borghesi M, Terrone C, Karakiewicz PI. The effect of chemotherapy in sarcomatoid bladder cancer patients treated with radical cystectomy. Can Urol Assoc J. 2023 Mar;17(3):E50-E56. doi: 10.5489/cuaj.8056. PMID: 36473471; PMCID: PMC10027350.</p> <p>Gu, L., Ai, Q., Cheng, Q. et al. Sarcomatoid variant urothelial carcinoma of the bladder: a systematic review and meta-analysis of the clinicopathological features and survival outcomes. Cancer Cell Int 20, 550 (2020). https://doi.org/10.1186/s12935-020-01626-9</p> <p>Changes required. In case presentation section, kindly clarify whether CT KUB was plain or with contrast.</p> <p>In results and discussion section, mention whether the initial histopathology (the one done after the TUBRT) had shown sarcomatoid differentiation or not.</p> <p>Intra-operative, multiple enlarged lymph nodes were found. Kindly mention whether these were seen on the pre-operative CT scan.</p> <p>NG tube and GOMCO – Kindly mention the full forms</p> <p>Urine leak will show as high drain output (not input) and low urostomy output (not input). Clarify if any imaging was done to demonstrate the site of leak.</p> <p>Final histopathology – peri-vesical and not peri-vascular.</p> <p>You have mentioned that adjuvant treatment in necessary if high grade disease or extra-vesical spread. Why did you not give adjuvant treatment in your case?</p> <p>What is the follow up of the case? How many months or years after the surgery. Any recurrence? And any other long-term complication or adverse event, including death</p>	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>Yes</p>	
<p>Optional/General comments</p>
