I suggest the authors to include more cites of researchers in the field related to foliar application effects on gerbera properties such as growth, yield and quality; and comparing that research with their discussion performed in their study. I strongly recommend the review of different literature scientific research. Moreover, I think the authors must expand their introduction, discussion, and conclusion sections accordingly with new literature review that might strengthen their investigation.</p> <p>2. Yes</p> <p>3. Yes</p> <p>4. Yes</p> <p>5. Yes</p> <p>6. Yes, although I suggest the authors to cite more articles to strengthen their findings.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	None. I think the manuscript is well written and has not typo or redaction errors.	
<p><b>Optional/General</b> comments</p>	I suggest the authors cite more articles related with the methodology they performed; and latter get a better understanding of the conclusions they found in their manuscript, discussing them with more details
