

**Editor's Comment:**

The review suggestions made by the reviewers should be respected, which is not the case in this article. For example a basic issue, but of great importance are the bibliographical references that the author did not even correct as indicated by the reviewer Juvy G. Mojares, when he says:

“Cited but NOT referenced (Obayomi and Oyekale, 2017), Pruss, Giroult and Rushbrook, 2022), Abayomi and Oyekale (2017), Department of Healthcare Manila (2022) “.

Another issue that facilitates the verification and approval of the article is that the authors do not only respond to the comments of the reviewers: "Revised". They should indicate unequivocally the revisions they actually made to the manuscript itself.
